# Empowering People Innovating Agriculture

## FARMS 5.0 Project!

FARMS 5.0 Future-Aligned Resilient Modern Systems for Farmers Adhering to Industry 5.0 Principles towards Sustainable Agriculture focuses on transforming agriculture to be more sustainable, resilient, and human-centric, in line with Industry 5.0 principles.

## FARMS 5.0 Project Partners Meet in Paris to Review Progress and Plan Next Steps

The FARMS 5.0 project partners came together in Paris for a transnational project meeting hosted by Infinitivity Design Labs (IDL). The meeting provided an opportunity to review project progress, share key achievements, discuss ongoing activities and coordinate the next steps towards achieving the project's objectives.

The project coordinator, Wrocław University of Environmental and Life Sciences (UPWr), led the opening sessions and presented a comprehensive overview of project implementation, including management activities, financial reporting, risk assessment and quality assurance.

During the meeting, partners shared important updates and results from their respective work packages. STANDO presented key findings from the Agriculture 5.0 in Europe report, highlighting developments and trends shaping the future of European agriculture. FACE Innovation outlined the upcoming steps in developing the FARMS 5.0 VET Training Program, while Infinitivity Design Labs demonstrated the digital learning platform and its functionalities. The Polish Farm Advisory and Training Centre presented recent dissemination achievements and discussed future communication and outreach activities aimed at increasing the project's visibility and impact.

The meeting fostered productive discussions, strengthened cooperation among project partners and helped align priorities for the next stages of implementation, supporting the development of innovative vocational education and training solutions for Agriculture 5.0.

# FARMS 5.0 Collaborative Hub: Connecting Research, Innovation and Agricultural Education

As part of the FARMS 5.0 project meeting, partners participated in a two-part Collaborative Hub focused on bridging agricultural research and practical vocational education and training (VET).

UPWr explored precision livestock farming and sustainable animal production, while PFA highlighted knowledge transfer and farmers' adoption of Agriculture 5.0 technologies. STANDO addressed skills gaps and their integration into VET training, and FACE Innovation presented innovative, competence-based teaching methods. Infinitivity Design Labs (IDL) showcased digital learning approaches, including gamification and micro-credentials, while AUTH discussed the potential of AI, IoT and data analytics for smart and climate-resilient agriculture.

The Collaborative Hub encouraged knowledge exchange and supported the development of practical, innovative training solutions for the agricultural sector.
