FARMS 5.0

FARMS 5.0 Partners Gathered in Paris for a Transnational Project Meeting to Advance Sustainable VET in Agriculture 5.0

Partners of the European initiative FARMS 5.0, which stands for Future-Aligned Resilient Modern Systems for Farmers Adhering to Industry 5.0 Principles towards Sustainable Agriculture, successfully conducted their Transnational Project Meeting on October 20–21, 2026. The event was hosted by Infinitivity Design Labs in Paris. The FARMS 5.0 project is co-funded by the Erasmus+ Programme of the European Union under Cooperation Partnerships in Vocational Education and Training.

The project coordinator, Wrocław University of Environmental and Life Sciences, led the opening sessions of the meeting. The coordinator presented a comprehensive progress review that covered Work Package 1 management, financial reporting, risk assessment, and quality assurance.

During the meeting, partner organizations presented significant milestones across various work packages. STANDO presented the results from the report focused on Agriculture 5.0 in Europe. FACE Innovation outlined the upcoming steps for the FARMS 5.0 VET Training Program. Infinitivity Design Labs conducted a live demonstration of the digital learning platform. Polish Farm Advisory and Training Centre reviewed recent dissemination achievements and outlined future outreach strategies.

Participants also engaged in a two-part Collaborative Hub that aimed to connect agricultural research with practical training solutions. UPWr presented precision livestock farming and sustainable animal production, focusing on smart nutrition, animal welfare and feed efficiency. PFA discussed knowledge transfer in Agriculture 5.0, highlighting practical approaches to supporting farmers in adopting innovative technologies. STANDO addressed the identification of skills gaps and the translation of research findings into relevant VET training activities. FACE presented innovative teaching methods, focusing on competence-based education, practical learning and assessment of learning outcomes. IDL explored digital and interactive learning tools, including e-learning, gamification, educational videos and micro-credentials. AUTH focused on the application of artificial intelligence, IoT and data analytics in smart agriculture and climate-resilient farming.
